Design Spotlight: Spa Baths

BATH / BATH

A closer look at bathrooms from Plum Builders and NÖMI, respectively, are stunning examples of how to achieve the ambiance and functionality of a spa

Joseph Tsedaka

NÖMI, Principal

A spa bathroom isn't just a lovely room in the home but a way of living. To provide an elevated experience, this bathroom was thoughtfully renovated into a luxurious primary bath with the works. Imagine starting each day like you just woke up at your favorite spa. You turn on the pendant lights, slip off your robe, step into the shower, adjust the water pressure, and relax while you take in the soft sounds of jazz. Ultimately, the right bathroom design will make you a better person, sharper, calmer, and more relaxed. In this space, all of these elements are accommodated and emphasized, including tech-friendly details, a rain showerhead, and body jets. A separate soaking tub sits right outside the shower door for extra relaxation. When designing a bathroom, keep bathing routines in mind and let the bathroom serve the homeowner so they can indulge themselves.
